HABITAS IN COMITIIS COLLEGI BOWDOINENSIS BRVNSVICI IN RE PVBLICA MAINENSI  
ANTE DIEM VIII KAL IVN ANNO SALVTIS MMVIII  
RERVMQUE PVBLICARVM FOEDERATARVM AMERICAЕ POTESTATIS CCXXXII

*The Latin text quoted above has introduced Bowdoin's Commencement Program since August 21, 1822. The names of the 24 graduates of the Class of 1822 were, for the most part, also translated into Latin for the program. In the early years of the College, each graduating senior was required to deliver a Commencement "part," an oration on ancient or modern topics, which was frequently given in one of the classical languages, Latin, Greek, or Hebrew. The final Latin oration was given in 1893, but the tradition of Latin survives in the language used to dedicate the Commencement Exercises and to confer the bachelor of arts degree. The translation below was provided by Barbara Weiden Boyd, Henry Winkley Professor of Latin and Greek.*

May it be good, felicitous, and well-omened:

[an ancient Roman formula used at the outset of a ritual to ensure its success]

To John Baldacci, esteemed Governor;  
to the Representatives and Senators  
who personally preside over the arts and letters for the State of Maine;  
and to the honorable and respected Trustees of Bowdoin College;  
to Barry Mills, distinguished President;  
to the entire academic senate; to the venerable religious leaders;  
in short, to all patrons of the human race everywhere,  
the young people hereby initiated into the arts and letters  
most humbly dedicate these exercises.

Held in a gathering of Bowdoin College, in Brunswick, in the State of Maine,  
on the ninth day before the Kalends of June, in the 2008th year of our well-being  
and in the 232nd year of the authority of the United States of America.

## **DEGREES**

is ancient formula is used by the President in conferring degrees:

*Candidati pro gradu baccalaureali, assurgite.*

**TWO HUNDRED THIRD COMMENCEMENT  
OF BOWDOIN COLLEGE**

May 24, 2008

## HONORANDS OF THE 2008 COMMENCEMENT

P B  
D H L (L.H.D.)

Peter Buck is a nuclear physicist and philanthropist who is perhaps best known as the co-founder of the Subway franchise restaurant chain. A native of South Portland, Maine, he earned master's and doctoral degrees in physics at Columbia University. From 1957 to 1978 he held positions as a nuclear physicist with several companies. In 1965 he made entrepreneurial history when he loaned a seventeen-year-old family friend \$1,000 to open the first Subway Sandwiches and Salads Shop. His endeavor grew to two stores the next year, sixteen shops by 1973, and individual franchise sales by the mid-1970s. By January 2008 there were 28,773 Subway restaurants in eighty-six countries. He established a foundation devoted to enhancing the quality of life in communities in North and South America, as well as an endowment to support cancer research programs. He has a particular interest in the National Museum of Natural History of the Smithsonian Institution, and the Peter Buck Chair in Human Origins there fosters scientific research in paleoanthropology.

Yvon Chouinard is the founder, president, and CEO of Patagonia, Inc., a leader in the field of outdoor clothing and gear. A native of Lisbon, Maine, he is a pioneering climber and manufacturer of climbing equipment who participated in a number of first ascents, including the North American Wall on El Capitan in Yosemite without the use of fixed ropes. His book *Climbing Ice* (1978) and his climbing tools are credited with starting the modern sport of ice climbing. Launched in 1972, Patagonia reflects Chouinard's environmental and social activism. The company continually seeks ways to minimize the environmental impacts associated with the manufacture, packaging, use, and discard of its products. In 2001 he co-founded One Percent for the Planet to support grassroots organizations committed to environmental protection. He is the author of *Let My People Go Surfing: The Education of a Reluctant Businessman* (2005), which outlines Patagonia's business philosophy of encouraging creativity and healthy lifestyles among its employees.

G K  
D L (L.H.D.)

Gina Kolata has reported on science and medicine for *The New York Times* since 1987. Before joining *The Times*, she was a senior writer for *Science*, and she has written numerous freelance articles for a wide variety of magazines. In her news articles and books she makes accessible to a wide audience the results of scientific research and the social, political, economic, and environmental issues raised by scientific inquiry. She was a Pulitzer Prize finalist in investigative reporting in 2000. Her books include *Clone: The Road to Dolly, and the Path Ahead* (1997), *Ultimate Fitness: The Quest for Truth about Exercise and Health* (2003), and *Rethinking Thin: The New Science of Weight Loss—and the Myths and Realities of Dieting* (2007), which was recently nominated for a 2008 James Beard Foundation Award. A native of Baltimore, Maryland, she graduated from the University of Maryland and studied molecular biology at MIT before returning to Maryland to earn her master's degree in applied mathematics.

## HONORS IN MAJOR SUBJECTS

The departments of Art, Biology, Chemistry, Computer Science, English, Geology, History, Mathematics, Music, Psychology, Romance Languages, and Sociology and Anthropology, and the Biochemistry, Environmental Studies, Gender and Women's Studies, Latin American Studies, and Neuroscience programs award only one level of departmental honors. Other departments award honors at the levels of Highest Honors, High Honors, and Honors, and the recipients are so designated.

## ACADEMIC APPAREL

The formal academic attire that distinguishes faculty and graduates at academic ceremonies is a symbol at once vertical and horizontal. It stretches back into history, to the roots of academic institutions, while at the same time it forms a bond of union among contemporary academic scholars.

The gown, cap, and hood, which would certainly seem quaint today if worn on our city streets, were originally the ordinary apparel of our medieval ancestors. The gowns varied in elegance according to the rank and wealth of the owners, and the hood had the practical function of being pulled over the head for warmth. Many of the medieval universities had strict rules on the subject; at Oxford, for example, the master of arts had to swear that he owned the dress prescribed for his degree and that he would wear it on all proper occasions. Undergraduates were required to wear their gowns whenever they appeared in the public street. After the sixteenth century in Europe different styles prevailed, but the older style was retained for certain legal, official, clerical, and, especially, academic uses.

In America the gown has been used to some extent since colonial times. It was only in the late nineteenth century, however, that widespread interest—sparked perhaps by the observance in 1886 of the 250th anniversary of the founding of Harvard—brought about several developments. In 1887 an enterprising member of the graduating class of Williams College designed academic gowns for the graduates to wear at the Commencement ceremony. The garb was significant and dignified; it was both traditional and democratic; it answered a need, and it quickly became popular. In 1895 an intercollegiate code, standardizing the design and the color of each part of the academic regalia, was accepted by nearly all American colleges and universities.

The gown is usually black, and the cut of the sleeves differs for bachelors, masters, and doctors. In addition, the doctor's gown has panels of velvet (usually black) down the front and on the sleeves.

The cap is generally black, with a tassel, which is either black or the color of the field of study; a doctor's may be gold. The most common style of cap is the Oxford "mortar board," with a square flat top, but some variations are permitted.

The hood is the most distinctive part of the costume. It is made of black and trimmed with velvet. Both the length of the hood and the width of the trim vary with the level of the degree, the doctor's being the longest and having the widest velvet border. The color of the velvet indicates the field of study in which the degree is earned: for example, white for arts and letters (bachelor of arts), dark blue for philosophy, brown for fine arts, golden yellow for science, scarlet for theology. The lining of the hood is the color and style of the university that confers the degree; these are all specified in the standard code of the American Council on Education. Bowdoin College's lining is white and green to symbolize the Bowdoin pines.

Whatever the degree or university, those who don the gown and hood symbolically take their places in the long procession of scholars who have pursued truth and learning and passed it on to others. The consciousness of that fellowship is at once a reward for past efforts and an inspiration for the future.

### Hood Border Colors Indicating Fields of Learning

Agriculture	Maize

## **RAISE SONGS TO BOWDOIN**

*Words by K. C. M. Sills, Class of 1901*

*New Lyrics by Anthony Antolini '63*

*Music by C. T. Burnett*

*Arr. by Thornton W. Allen*

Raise songs to Bowdoin, praise her fame,  
And sound abroad her glorious name;  
To Bowdoin, Bowdoin lift your song,  
And may the music echo long  
O'er whispering pines and campus fair  
With sturdy might filling the air.  
Bowdoin, from birth, our nurturer and friend  
To thee we pledge our love again, again.

While now amid thy halls we stay  
And breathe thy spirit day by day,  
Oh may we thus full worthy be  
To march in that proud company  
Of poets, leaders and each one  
Who brings thee fame by deeds well done.  
Bowdoin, from birth, our nurturer and friend  
To thee we pledge our love again, again.
